MEMORANDUM FOR ADCSOPS-HUMINT

SUBJECT: UPDATE BRIEFING FOR CG, INSCOM

1. (U) On 22 February 1983, from 1315 - 1335 hours an update briefing was presented to CG, INSCOM, at Room 130 Arlington Hall Station. Also attending was Col Charles Partridge, INSCOM Chief of Staff. This update briefing was requested by the CG in lieu of a formal briefing scheduled for two hours at Fort Meade.

2. (U) An information paper was prepared covering recent GRILL FLAME actions which might arise in his meeting with the ACSI which was to occur the same afternoon (Incl 1).

3. (S/NOFORN) Following a review and discussion of the information paper the CG requested information on the following:

a. Operations - I provided him with the number and requestors of on-going projects and anticipated projects and sponsors .

b. Personnel - I provided the numbers of sources and their status. The CG was concerned with the decrease in source strength.

c. Recruitment - I updated the CG on proposed actions to increase the numbers of people completing the initial screening questionnaire. The CG emphasized that he was not looking for quantity but for people who would be assets to the program. He indicated approval of the following approaches:

(1) ASD - At locations they normally visit include our screening questionnaire with their normal material.

(2) HPTF - Using a HPTF cover letter to forward the initial screening questionnaire to Ft Huachuca, with the objective to cover all new students.

(3) TDY - A trip to access an individual recommended by a previous member of the project, for possible recruitment.

(4) RETURNEES - Approved reassignment of project members who wish to return. The specific case of an individual in Europe who will be returning to CONUS in the Dec 83 - Jan 84 time period was discussed.

4. (S/NOFORN) CG was also concerned that the SOW in the DIA contract with SRI would cover projects that would not be of greatest value to INSCOM. I indicated I would find out what is covered in the current (FY83) contract and also which projects will be done with the \$200K of P6 money that DIA has received from DARPA.

5. (S/NOFORN) CG's final comments.

- a. Recruit quality people.
- b. Break codes.
- c. Catch spies.
